

The project "Multidimensional Integrated Risk Governance" (MIDIR) was a Coordinated Action in the Sixth Framework Programme of the European Commission, Area "Science & Society", Priority "Integrative approaches to risk governance". Its main outcome is the MIDIR Approach, a Multidimensional Integrated Risk Governance framework, based on existing research. It is a comprehensive and scalable governance approach that can help create a culture of resilience and sustainability within and between groups. It includes performance monitoring capabilities suitable to organisations and to networks of organisations.

Partners of MIDIR were

- [National Research Council, Institute of Research on Population and Social Policies](#) (Italy), with support of [T6 Ecosystems srl](#) (Italy)
- [University of Dortmund, Faculty of Spatial Planning](#) (Germany)
- [iku GmbH](#) (Germany)
- [Gaiasoft International Ltd.](#) (UK)
- [Federal Ministry of Labour, Social Affairs, Health, Family and Women of Rhineland-Palatinate](#) (Germany)
- [Lazio Region](#), with support of [LAit S.p.a.](#) (Italy).

The project started in June 2006 and finished in May 2008.
